847- 550-5058

## Lake Commisioner's Update

2015 was a great year for our lake. We continued with our lake management weed and algae treatment during the summer. We also tested the water quality to ensure safe swimming for our residents and every test came in well below the acceptable range meaning our water was safe to swim in according to the standards put in place by the Lake County Health Department.

Lake County Lake Managements Unit also conducted a lake survey this past summer. 2008 was the last time the survey was done on our lake. Alana Bartolai, Water Quality Specialist, will be at our community board meeting to present the findings of the lake survey. Please come out and hear all the goings on with our lake and ask questions too. The survey will be on the county website once it is finished and I will provide the website link.

This summer we will once again treat the lake for weeds and algae. We have changed companies this year. Several companies were contacted and presented bids. The board reviewed each bid and heard presentations. Clarke Aquatic Services will come out and survey the lake, present us with a treatment plan to target the specific weeds and through the information provide we can develop our lake management plan. Anyone interested in the development of our lake management plan and the treatment plan for the lake please contact me at [anne@mcmorris.net](mailto:anne@mcmorris.net).

This spring new ropes and floats will be place to designate the swim area at the beach. We will also be replacing the fishing pier. The wood has rotted on that pier making it unsafe which is why it is currently roped off. Anyone interested in helping with that repair please contact me. The frame is in great shape so the plan is to replace the old wood with marine quality products.

## CALENDAR OF EVENTS

### Park Commissioner Update

Hey Jay Gwizdala here, your Park Commissioner. I've been busy painting the rest of the park benches and continuing the restoration along the park inlet. Also, I'll be moving the boat rack more west along the channel. If your canoe was on there it will still be. Enjoy the beach and have a safe summer!

### Community Center Rentals

Host your next family event at the Community Center! If you are current with your annual Echo Lake dues, the center is available to rent for \$175 which is a steal for the quality of the venue. There are two bathrooms, a full kitchen with two refrigerators, two microwaves, a gas stove, tables and chairs for 60 people. A copy of the rental agreement is on the ELCC website or contact Shar Becker at 847-975-6841 to check the availability of your date and reserve now!

### April 27: Community Meeting

Alana Bartolai, Water Quality Specialist, will be at our community board meeting to present the findings of the lake survey.

### TBA: Echo Lake Community Event

Join us for our annual echo lake community event. More details and information will be announced on our website and at signs at the entrances closer to the event date.
